Precipitation probability							
<05%	10%	50%	50%	40%	20%	00%	00%

Forecast for Sunday 28 Nov 2021

Weather: Clear spells though morning will give way to a brief spell of more organised snowfall sinking south or southeast across the area in the morning. Winds will be strong enough to give a risk of blizzards even at low levels given recent snowfall. Skies clearing from the north in the afternoon giving some sunshine. Thickening high cloud through evening.

Chance of cloud free mountain/hill tops above 800m: 20% morning, 70% afternoon.

Visibility: The details are a little uncertain but areas of cloud could be extensive above 400-600m through morning in association with snowfall. Blizzard conditions possible at most levels. Much improved through afternoon as cloud lifts and breaks from the north although a few patches may linger into the evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Afternoon sunshine will lead to glare off the existing snow cover. Bitterly cold with a good chance of poor visibility through the first half of the day.

Forecast for Monday 29 Nov 2021

Weather: Southwesterly then westerly winds will strengthen and bring areas of thicker cloud across all ranges, this falling as snow above 300m or so initially, gradually rising to munro level or above by the end of the day. Rainfall below this will generally be light, but rather persistent and will lead to a gradual thaw of lying snow away from highest levels. Visibility very limited at height.

Maximum wind: Southwest 15-25mph veering West or Northwest 25-35 gusting up to 40mph by the end of the day.

Chance of cloud free mountain/hill tops above 800m: 10% or lower.

Visibility: Cloud will quickly become extensive above 400-500m, perhaps lower along the West Coast bringing widely very poor visibility in cloud and snowfall. Lower slopes remaining hazy as snow turns to rain here.

Temperature: **Glens:** Plus 2 Celsius rising to 8 Celsius.
At 800m: Minus 4 Celsius slowly rising to plus 2 Celsius by the end of the day.
Freezing level: 200-400m at first, rising above summits through afternoon.
